Trustforce is a leading information security and privacy protection company. Our core activities are projects, secondment and education.

By combining the knowledge and experience of our specialists with a drive for knowledge and implementation of solutions, we provide added value in solving complex cyber security and privacy issues. Our assignments and projects take place with the top 200 companies and government organizations, mainly in the Netherlands.

Due to the increasing demand from our customers, we are looking for new colleagues.

Cyber Security Consultant (m/f)

SUMMARY

The cyber security consultant operates in the broad domain of information security. The cyber security consultant is a specialist in areas such as risk and business impact analyses, project management, security awareness, education and implementation of related policies and procedures. The cyber security consultant mainly focuses on the organizational aspects of information security. The security consultant is a specialist regarding implementations of the governmental Baseline Information Security (BIO), ISO 2700x, NEN7510, and Information Security Management in general.
